

Principal Scientist II / Senior Principal Scientist (PK Science)

Job ID

REQ-10044967

Apr 07, 2025

United Kingdom

Summary

50 + projects are being supported in the Immunology Therapeutic Area within the PK Sciences department. We provide PK and PK/PD strategies from early discovery all the way through to registration and beyond. The Immunology portfolio represents a balanced and broad portfolio of modalities spanning from classical small molecule candidates over to targeted protein degraders, and multiple variants of biologics modalities extending to CAR-T cell therapies and T-cell engagers. Since our portfolio is growing, our Team likes to expand by adding a Team member who will drive projects through Project Start and Lead Optimizations incl. First-in-Human (FiH) and all clinical phases.

Your responsibilities

- Independently represents PK Sciences as a core member of cross-functional Teams teams supporting projects
- leads a PKS sub-team to define and implement PKS strategy for compound progression and development.
- Analyze and interpret PK/PD/IG data generated during and present results to the program.

Proactively identifies potential project hurdles, provides solutions and contributes to contingency plans

- Presents PKS plans at various review boards and seeks approval for overall project strategy and budget
- Publishes internally or externally as main contributor to enhance Novartis and PK Sciences visibility.

Please note this is a hybrid role - there is a requirement of a minimum of three days on site in the London office per week or twelve days a month.

We are unable to offer permit sponsorship for this role.

About the Role

What you'll bring to the role:

- Ability to work in and adopt to a changing scientific & regulatory environment
- A strong team player, demonstrating excellent communication skills with experience in leading cross functional teams
- A curious mind and a genuine interest in collaborative interactions across disciplines
- PhD, MD or PharmD in life sciences/healthcare

- Credible background and in-depth expertise in drug candidate profiling for progression to FiH
