Summary

Data42 is hiring a Technical Product Manager to lead the design, development, and delivery of its Data & Analytics products, requiring a strong understanding of various data technologies and analytics tools. Excellent leadership, communication, and project management skills are needed, along with the ability to strategically interact with multiple teams across the company

About the Role

Job Description:

Data42 is seeking a dynamic Technical Product Manager to spearhead the efficient design, development, and delivery of our Data & Analytics products. The individual should illustrate superior leadership, communication, and project management skills. It is essential to have expertise in catalyzing product strategies, backed by a robust knowledge of diverse data technologies and analytics tools. Interaction across various functional and development teams across the company is crucial to this role.

Responsibilities:

1. Strategize, develop, and implement the product roadmap aligned with market insights, customer needs, and business objectives.
2. Partner closely with the data42 Technology lead to manage the Product Portfolio Council"
3. Lead product roadmap development and execution for the Data42, aligning with company goals and strategy. Evaluate and incorporate appropriate technology solutions to meet business and product goals.
4. Analyze user feedback, market trends, and business indicators to define product enhancements or novel features.
5. Establish effective communication channels with stakeholders ensuring alignment in product development and delivery.
6. Lead cross-functional teams to ensure product initiatives are conceived, monitored, and delivered as per agreed timelines.
9. Foster innovation by keeping updated with contemporary trends, tools, and technologies in data analysis and product management.
10. Ensure data security and compliance with best practices, privacy laws, and regulations.

11. Mentor and guide junior staff to promote a highly productive, engaging, and inclusive work environment.

Qualifications:

1. Bachelor's degree in computer science, Engineering, or a related field.
2. 10+ years of experience in managing technical products with strong technical background;
3. Demonstrable experience as a Technical Product Manager, or comparable role, within a data focused company. Strong experience in project management, preferably with Agile methodologies.
4. Excellent leadership, team management, and communication skills.
5. Strong decision-making skills with a demonstrated ability to drive product strategy based on competitive analysis, market, and product research.
6. Ability to communicate effectively with teams and clients.
7. 8. Great organizational and time-management skills with the ability to multitask.
9. Ability to stay current with technological developments and advancements in the field of data and analytics.
