

Careers in research and development

Join our community of scientific innovators

What does it take to discover and develop cutting-edge medicines that address society's biggest disease burdens? Thousands of scientists and physicians. Hundreds of global academic, biotech and digital partnerships. All working together with courage and ingenuity to bring medicines that matter to patients around the world. This is the community you'll be part of when you join one of our R&D teams.

Our teams

Explore our Research & Development teams and see where you could make a difference.

Biomedical Research

Join us in our engine of innovation to collaborate across scientific and organizational boundaries, explore powerful new technologies and pioneer therapeutic breakthroughs for patients. Key areas of research include cardiovascular, renal and metabolic diseases, oncology, immunology and neuroscience.

Development

Want to help lead the clinical development of potential new medicines? Here you can be part of running large clinical trials and steering the path to regulatory approval to treat patients around the world. Our Development teams are also responsible for maintaining oversight of ongoing patient safety and regulatory activities for licensed therapies.

“We are absolutely encouraged to share knowledge with others, so we can be quicker in developing safer approaches to treating cancer.”

Silvana, Senior Principal Scientist

Latest stories

Unique insights and perspectives from people across Novartis.

How I found my true purpose at Novartis

I started my career as a research fellow in Singapore, doing basic research. It was interesting work, but I always felt there was something missing.

Mentoring matters: how we grow together at Novartis

You can be successful, as an individual or as a business, without having to do it all on your own.

Belonging here: How Novartis helped me come out as a transgender woman

When I was in my late forties, I came to the realization that I was transgender. I signed up with a transgender clinic in Basel and went through a period of counselling.
