

Novartis condemns the terrorist actions against people in Israel and loss of innocent lives

Oct 13, 2023

Novartis condemns the terrorist actions that have been committed against people in Israel. Our thoughts are with all those affected by the tragic events, and with their families and loved ones. Violence against innocent people runs counter to our work to improve human health and to our fundamental belief in and respect for our common humanity.

We are monitoring the situation, and we remain committed to ensuring the safety and wellbeing of our associates and to providing access to medicines for patients in every country we operate in.
