### Postdoctoral Fellowship

Looking to work on innovative research projects that span biology, chemistry, and computational science? The Novartis Discovery Postdoctoral Fellowship offers a three- to four-year opportunity to collaborate with professional mentors in our Biomedical Research team. With access to advanced research tools and a cutting-edge drug discovery environment, you'll contribute to interdisciplinary projects and explore solutions across various disease areas.

#### Length of the program

3-4 years

#### Location

Basel

#### Recruitment calendar

April - September

#### Get notified

Sign up to be the first to know when we start recruiting again.

---

### Regulatory Affairs Postgraduate Fellows Program

Are you keen to gain extensive regulatory knowledge and hands-on experience in the pharmaceutical industry? The RA Postgraduate Training Program provides a unique opportunity to contribute to a variety of activities across the entire life cycle of pharmaceutical products. Immerse yourself in a dynamic, cross-functional environment and benefit from the diverse Novartis research and development portfolio to gain broad experience in RA activities.

#### Length of the program

2 years

#### Location

Basel

#### Recruitment calendar

April - May

## **Translational Clinical Oncology Program (TCO)**

Are you driven to develop transformative medicines that make a difference in patients' lives? This program offers an in-depth, hands-on development experience as part of TCO's mission to deliver new treatments for cancer patients. Your work will be crucial in executing scientifically driven early clinical trials, shaping the next generation of therapeutics. Join us and contribute to breakthroughs in patient care.

### **Length of the program**

2 years

### **Location**

Basel

### **Recruitment calendar**

July (every 2 years)

### **Get notified**

Sign up to be the first to know when we start recruiting again.

---

## **Chemical and Analytical Development Early Talent Program (CHAD)**

Are you ready to dive into the global functions of chemical research and development and drug substance supply at Novartis? This program offers a unique opportunity to discover these areas through various rotation assignments within CHAD. Gain comprehensive insights and hands-on experience that will set the stage for a promising career in the pharmaceutical industry.

### **Length of the program**

2 years

### **Location**

Basel

### **Recruitment calendar**

December - January

### **Get notified**

Sign up to be the first to know when we start recruiting again.

---

## **Internships Pharma Development**

Are you excited about the science behind innovative pharmaceuticals? This program offers the chance to be part of cross-functional teams in a highly collaborative and scientific environment. You'll focus on the formulation, particle engineering, and characterization of dosage forms for both chemical and biologic entities, translating this expertise into the production of groundbreaking pharmaceuticals. Join us to drive forward the future of the industry.

### **Length of the program**

6 - 12 months

### **Location**

Basel

### **Recruitment calendar**

February - March

### **Get notified**

Sign up to be the first to know when we start recruiting again.

---

## **Postgraduate Program TRD Biologics**

Are you intrigued by the process behind developing cutting-edge biologics? This program offers exclusive insights into the operation of Technical Research and Development (TRD)-Biologics. You'll explore our global functions, including Drug Product Development, Drug Substance Development, Global Device and Packaging Development, and Analytical Development. Embark on this journey and lay the foundation for a successful career in biologics development.

### **Length of the program**

2 years

### **Location**

Basel

### **Recruitment calendar**

September - October

### **Get notified**

Sign up to be the first to know when we start recruiting again.

---

## **Clinical Development Postgraduate Program**

This Program offers the chance to work on global clinical trials as part of cross-functional drug development teams. Fellows develop deep insights into the clinical development process while contributing to critical projects that impact patient lives. It's an exceptional opportunity to start a career in clinical development

### **Length of the program**

2 years

## **Translational Medicine Academy in Clinical Sciences & Innovation (CS&I)**

Have you always wondered how groundbreaking medicines make it from research labs to patient care? Join Translational Medicine (TM) and support clinical trials, bridging drug discovery and clinical applications. In our immersive 2-year program, you'll receive excellent training and mentorship within a diverse and global environment. Ready to make a real impact on millions of lives? This is your chance!

**Length of the program**

2 years

**Location**

Basel

**Recruitment calendar**

February - March

**Get notified**

Sign up to be the first to know when we start recruiting again.

---

**Translational Medicine Academy in Preclinical Safety (PCS)**

Do you want to apply your expertise to advancing preclinical safety? Join us as a Translational Medicine (TM) Academy fellow in Preclinical Safety at Novartis, and help unleash the power of translational safety science for drug discovery and development. Over a 2-year period, you'll play a key role in bridging research and clinical application to develop innovative therapies. This is your chance to make a significant impact in the world of medicine!

**Length of the program**

2 years

**Location**

Basel

**Recruitment calendar**

February - March

**Get notified**

Sign up to be the first to know when we start recruiting again.

---

**Translational Medicine Academy in Pharmacokinetics (PKS)**

Have you always wondered how breakthrough medicines make it to patients? Join Translational Medicine's 2-year program starting in September 2025. Receive training and mentorship in drug discovery and clinical application, working on innovative projects in Pharmacokinetic Sciences and Clinical Pharmacology. Contribute to therapeutic areas like RLT, Biologics, cell and gene therapy. Ready to make a real impact?

---

**Translational Medicine Academy in Data Science (DS)**

Did you know that data science is transforming drug discovery and development? As a Translational Medicine (TM) Academy fellow in Translational Data Sciences in Preclinical Safety, you'll join Novartis for a 2-year program to harness the power of data science in enhancing drug development. Contribute to bringing innovative medicines to patients by bridging research with clinical application. Ready to make a real impact in the field of medicine? This is your chance!

---

**Translational Medicine Academy in Biomarker Development (BMD)**

Curious about the role of biomarkers in clinical development? Join our 2-year BMD fellowship program. You'll receive training and mentorship, learn to use biomarkers to define disease stages, predict treatment outcomes, and select patients for therapies. This is your chance to make a real impact in medicine!

**Length of the program**

2 years

**Location**

Basel

**Recruitment calendar**

February - March

**Get notified**

Sign up to be the first to know when we start recruiting again.

---

**Translational Medicine Academy in Discovery & Profiling (TMDP)**

This program is designed for physicians who have completed their clinical training, such as residency or fellowship, or hold a faculty position at an academic medical institution. The 2-year program seeks to leverage your advanced clinical skills and knowledge to contribute to research and innovation at Novartis. This opportunity is perfect for you!

**US**

**Beacon of Hope Biomedical Research Graduate Summer Fellowship**

Are you a graduate student from HBCU (historically black colleges and universities) with a passion for drug discovery, data analytics, or clinical research? Our 10-week paid summer fellowship program is your opportunity to dive into the world of cutting-edge science and innovation. You'll be paired with a Novartis scientist mentor, gaining hands-on experience working on groundbreaking research, technology, and data-driven projects. It's a fantastic way to expand your skills, build your professional network, and see what it's like to make a difference in the world of healthcare and drug development.

**Length of the program**

10 weeks

**Location**

East Hanover, NJ & Cambridge, MA

### **Beacon of Hope Analytics Graduate Summer Fellowship**

Are you a graduate student from HBCU (historically black colleges and universities) ready to explore the world of cutting-edge drug development? Our 12-week paid summer fellowship program is your gateway to hands-on experience in clinical analysis. You'll be matched with expert analytics mentors, tackle real-world challenges in drug development and gain invaluable insights along the way. It's a unique opportunity to sharpen your skills, dive deep into exciting projects, and see firsthand how your work can drive innovation in healthcare.
