Impact

A well-established program that contributes highly to the success of our organization. It connects us with an agile and bold mind-set of the next generation. Our talent bring in and develop key capabilities that are essential for our future as an innovation-driven company. By building a cross-functional knowledge and networks our trainees amplify collaboration across teams. Our program also equips our talent to become future leaders, comprising of opportunities to be a people manager or leading on high impact projects or networks –for us leadership has many aspects. Depending on the aspiration it is also a great foundation for an international career.

Participant's Growth

- You will work on impactful projects and tasks in different functions which enable you to learn based on experience, gain the big picture of Novartis and quickly build a wide functional and personal network.
- Regular feedback, exposure to senior leaders, a personal development program and coaching sessions will accelerate your growth
- You will collaborate, share and learn as part of a unique Early Talent community -locally & internationally with monthly Trainee Jour Fix, workstreams, learning and networking sessions
- A permanent contract gives long-term perspective and psychological safety to explore and evolve.

Requirements

- You have completed a Master's degree with a specialization in line with the program you choose. The Medical track requires a PhD.
- You are interested in an international career and already gained experience abroad.
- You are fluent in German and English (written and spoken)
- You bring an agile and curious mind-set, are used to leave your comfort zone and bold to explore new paths. You are a teamplayer with strong communications skills.
- Specific requirements please check our local website that provides details on each track and first-hand experience from our alumni trainees.
