

Assoc. Dir. DDIT IES Infrastructure Solution Delivery

Job ID
REQ-10044010
Mar 18, 2025
Czech Republic

Summary

Novartis is unable to offer relocation support for this role: please only apply if this location is accessible for you.

The Associate Director of DDIT IES Infrastructure Solution Delivery translates business requirements into IT solutions that meet customer expectations while ensuring they are safe, reliable, scalable, and hybrid. This includes public cloud environments such as AWS and Azure, as well as private cloud infrastructures. The role involves creating detailed IT solution/service capabilities based on functional specifications to fulfill quality, performance, and technical constraints. Additionally, it involves developing detailed process designs needed for the day-to-day operation of the software/service. It is essential that all solutions adhere to the architectural roadmap and support the ongoing development, execution, and operations of the software/service.

This is an infrastructure solution delivery position with 10+ years' experience; ideal candidate is expected to demonstrate in-depth data centre and public Cloud Infrastructure expertise with a keen focus on AWS:

About the Role

Key Responsibilities:

- In-depth engineering, design, and operations experience with AWS, including associated certifications. Professional experience architecting large-scale solutions on AWS.
- Create and lead solution designs for internal customers and help scope requirements to meet business needs. Develop project rationale and perform scoping assessments to determine project feasibility.
- Ensure overall user experience is considered when designing and deploying new solutions and services. Ensure implemented solutions are according to specifications and fit for purpose.
- Ensure designs adhere to architectural roadmap and support development, execution, and operations of software/services.
- Plan deployments with Project Managers and Operations Team across development, validation, and productive environments.
- Review deployment packages with developers, including testing, preparing checklists, scripts for manual deployments, and documentation.
- Translate business requirements in a presentable manner in line with company standards, ensuring operational integrity. Investigate assigned problems through to resolution or root cause, coordinating actions of others as necessary for analysis and resolution.
- Play a key leading role in ensuring successful end-to-end infrastructure solutions. Provide technical and

application guidance and support throughout engagements.

- Perform impact analysis to support application teams. Support continuous improvements to IT service management processes and services.
- Engage with multiple stakeholders at the business functional level, understanding security and compliance requirements and proposing solutions. Ability to work on large and complex projects in a matrix environment covering a wide spectrum of technologies.

Commitment to Diversity & Inclusion: :

We are committed to building an outstanding, inclusive work environment and diverse teams representative of the patients and communities we serve.

What you'll bring to the role:

- 10+ years on the job supporting Cloud (AWS) and on-premises enterprise infrastructure solution delivery
- Bachelor's degree in Computer Science, Information Technology, Engineering, or a related field or relevant experience in the domain
- In-depth knowledge of AWS services, including compute, storage, database, networking, security, and management tools.
- Ability to translate business requirements into scalable, reliable, and cost-effective cloud solutions.
- Ability to work across geographic boundaries; supporting global enterprise business and liaising with security, architecture, quality, engineering and operations teams globally. Strong analytical and problem-solving skills to diagnose and resolve issues effectively.

You'll receive:

Monthly pension contribution matching your individual contribution up to 3% of your gross monthly base salary; Risk Life Insurance (full cost covered by Novartis); 5-week holiday per year; (1 week above the Labour Law requirement) ; 4 paid sick days within one calendar year in case of absence due to sickness without a medical sickness report; Cafeteria employee benefit program – choice of benefits from Benefit Plus Cafeteria in the amount of 12,500 CZK per year; Meal vouchers in amount of 90 CZK for each working day (full tax covered by company); Car Allowance; MultiSport Card.
